## ABOUT RhAPP

**Rheumatology Advanced Practice Providers (RhAPP)** is an initiative dedicated to developing educational programs, providing professional advancement services, and assembling resources for—and guided by—advanced practice providers (APPs).

Through our peer-to-peer network, we seek to support the integral role APPs play in the rheumatology healthcare community by providing the most relevant and timely information and communication for the treatment of their patients with rheumatic diseases.

## MISSION STATEMENT

To have APPs deliver comprehensive educational updates through a platform designed to allow for rich interaction and exchange of ideas between NPs, PAs, & PharmDs on the topics most clinically relevant to the treatment of immune-mediated inflammatory diseases.

## CURRENT FOCI

- Workforce issues
- Unmet educational needs
- Diagnosis, management, and treatment of immune-mediated inflammatory diseases
- Management of comorbidities
- Safety and use of conventional DMARDs, biologic and biosimilar therapies, and small molecule therapies
- Guideline implementation

In addition, RhAPP will provide programming and opportunities designed to support peer-to-peer networking, career development, and advancement for existing APPs as well as clinical placement for APPs joining the rheumatology workforce.

## THE RhAPP APPROACH

RhAPP is the preeminent educational opportunity for APPs in the field of rheumatology. RhAPP provides cutting-edge education, peer-to-peer networking, and resources, all of which are developed by APPs for APPs. APPs play a critical role in the care and management of patients with rheumatic diseases, and RhAPP equips colleagues with the education, tools, and resources they need to be leaders in the field and provide unmatched care for their patients.

### 2022 CONFERENCE OVERVIEW

The objectives of the 2022 RhAPP conference are to bring APPs together for an in-depth clinical update, to foster an interactive discussion of the latest scientific and clinical developments, and to review important, current concepts relating to the multidisciplinary treatment of patients with rheumatic diseases. The conference will exclusively feature expert APP speakers and will offer a combined plenary, small-group learning environment to facilitate interaction between attendees and faculty on the most clinically relevant topics, including RA, SpA, lupus, lupus nephritis, vasculitis, pediatric disease, scleroderma, bone disease, gout, pain management, sarcoidosis, and mixed connective tissue disease.

The conference is intended to foster collaboration, share best practices, provide a forum for peer-to-peer interaction among advanced practice providers, and provide attendees with:

- Clinically relevant information concerning advances in research via scientific posters, abstracts, and presentations
- An opportunity for professional development and interaction with leading experts in rheumatology
- The latest research/abstracts: access to information on the most recently presented abstracts at the EULAR & ACR meetings and the most up-to-date scientific knowledge on various topics
- The opportunity to network with colleagues and meet up with peers to exchange ideas and forge new contacts and friendships
